

MINUTES SUMMARY

Date: 07-11-2018

Time: 16:00 – 16:45

Members in attendance:

- Hartingsveldt, Stan S. Van – Project Tutor
- Cheperkova Nadya – Project Leader and Secretary
- Ezeh Chioma Jane – Project Member
- Lazarevic Stefan – Project Member
- Jiazheng Zhu – Project Member

Agenda

- Final discussion on the first block deliverables

Notes

The meeting started with the discussion of the ERD and there are several changes that need to be made

- **Product entity** – The attributes ‘Drink’ and ‘Food’ can be specified only as ‘Product Name’
- **Customer entity** – The relationship from Customer to Loan_Item is optional
- **Customer_Account entity** – This entity is not needed because the relationship between Customer_Account and Customer is one-to-one, so the attributes from Customer_Account can go in the Customer entity
- **Ticket entity** – Think more about the relationship between Ticket and Customer or remove Ticket entity
- **Item_Loan entity** – It needs to contain Start date, Return date and State Returned

We continue the discussion with the website

- The user can easily make a Profile, but his/her details are stored in the database only when he/she purchase a ticket

We continue the discussion with the design of the applications

- **Shop application/Loan application** – It needs to display the name and the price of the products; When the product window shows up, it should display the number in stock of the specific product; The Cart needs to count the products of the same type and not adding them one by one
- **Loan application** – It needs to display the name of the product

Work division for next week

Jiazheng Zhu - Working on the process report

Cheperkova Nadya – Working on the functionality of the website

Ezeh Chioma & Lazarevic Stefan - Working on the functionality of the applications

All group members - Creating Database

Next week

The next meeting is not defined yet
