# Agreements - made with the client

We agreed on the following deliverables with our client Postma, André A. who is the organizer of the cultural event:

4		_ 1_	_ :	4 -
Ш	W	en	SI	Tе
_			-	

☐ It will display nicely on a laptop but also on a mobile phone.

### • 7 applications

- ☐ An application to check-in and check-out for the event
- ☐ An application for check-in and check-out for campsite
- ☐ An application for the shops
- ☐ An application for loan stands
- ☐ An application for reservation
- ☐ An application for the ATM machine
- ☐ An application for status information which is only for the manager use.

## **Processes**

### **Use cases - applications**

Name: Event Check In

**ID**: UC01

**Actor:** Employee

Precondition: Actor opens the "Check-IN AND Check-OUT Application".

### Main success scenario:

1. Actor selects "Check In".

2a.RFID is not valid.

- 1. Use case ends.
- 2b. The result is not shown in the listbox.
  - 1. Use case ends.

### **Postcondition:**

Event Check In is successful.

Name: Event Check Out

**ID**: UC02

**Actor:** Employee

**Precondition:** Actor opens the "Check-IN AND Check-OUT Application".

### Main success scenario:

- 1. Actor selects "Check Out".
- 2. Actor scans the RFID chip of the visitor and the listbox shows the result (Success with green background and Fail with red background)
- 3. Actor checks the result in the listbox and decide if the visitor can go outside or not.

### **Exceptions:**

1a. "Check Out" is not selected.

1. Use case ends.

2a.RFID is not valid.

1. Use case ends.

2b. The result is not shown in the listbox.

1. Use case ends.

### Postcondition:

Event Check Out is successful.

Name: Camping Check In

**ID:** UC03

**Actor:** Employee

**Precondition:** Actor opens the "Check-IN Check-OUT Camping" application.

Main success scenario:

- 4. Actor selects "Check In".
- 5. Actor scans the RFID chip of the visitor and the listbox shows the result (Success with green background and Fail with red background).
- 6. Actor checks the result in the listbox and decide if the visitor can go inside or not.

### **Exceptions:**

1a. "Check In" is not selected.

1. Use case ends.

2a.RFID is not valid.

- 1. Use case ends.
- 2b. The result is not shown in the listbox.
  - 1. Use case ends.

### **Postcondition:**

Camping Check In is successful.

Name: Camping Check Out

**ID:** UC04

Actor: Employee

**Precondition:** Actor opens the "Check-IN Check-OUT Camping" application.

### Main success scenario:

- 4. Actor selects "Check Out".
- 5. Actor scans the RFID chip of the visitor and the listbox shows the result (Success with green background and Fail with red background)
- 6. Actor checks the result in the listbox and decide if the visitor can go outside or not.

### **Exceptions:**

- 1a. "Check Out" is not selected.
  - 1. Use case ends.

2a.RFID is not valid.

- 1. Use case ends.
- 2b. The result is not shown in the listbox.
  - 1. Use case ends.

### **Employee Access Application**

As we all agreed that we decide to add an application for employee login to their own department apps.

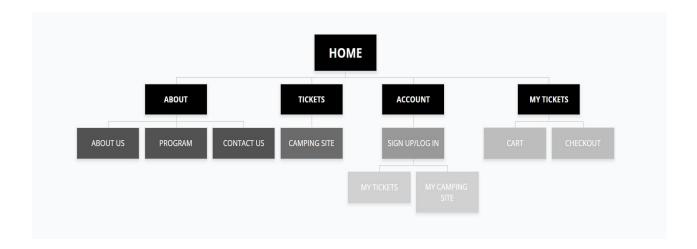

When employees work in the festival, they need to login to their own department apps by their username and password.

- 1. Employee inputs his/her valid username.
- 2. Employee inputs his/her correct password.
- 3. Employee clicks "LogIn" button.

# Website

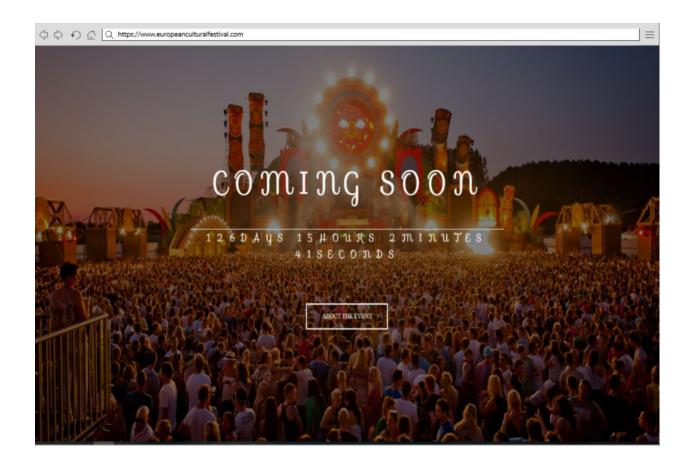

The sitemap and visual design of website is shown below. All information about the event, the tickets with/without camping sites and other related information about visitors' accounts can be easily find in the website's navigation bar.

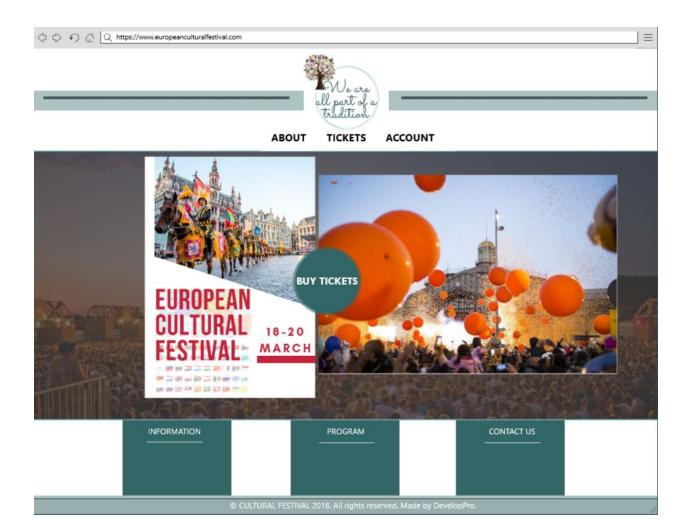

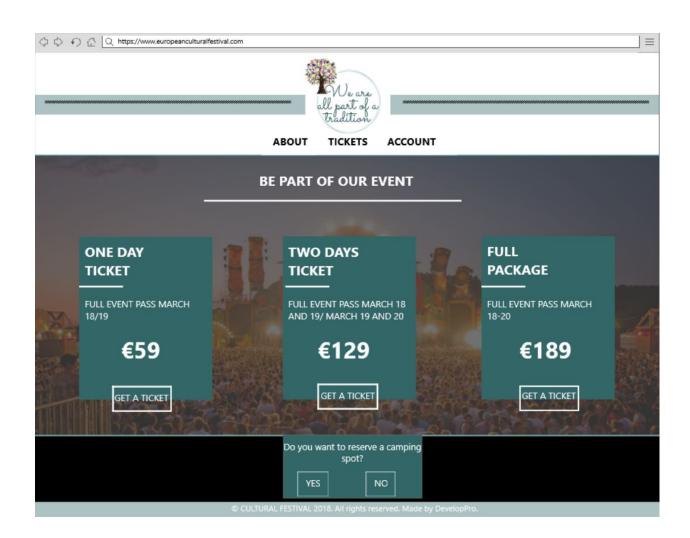

# Website - Visual designs

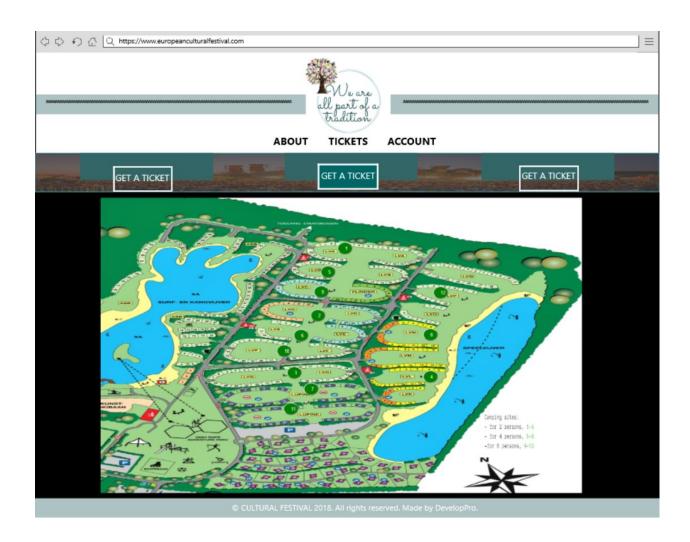

Changes on the website:

We add a process bar for ticket and camping reservation services.
